Many home owners are installing an air purification systems in their homes. These systems come in a wide variety of models. If you want one for your home, you can have your pick from a variety; they range in features, sizes and price. Even if you are on a budget, there are systems that you can afford.

Most likely, wherever you live, your air is contaminated with a variety of unhealthy particles. The air you breath is likely filled with indoor air pollutants such as dust, pollen, mold, animal dander and possibly tobacco smoke. Although you may not be able to actually smell these pollutants, they can still irritate, aggravate, and even instigate a number of health problems. Fortunately, there is an easy and quite stylish solution. The Blueair Air Purifier is your first line of defense. Their HEPASilent technology removes 99.97% of particles at 0.1 micron on it's lowest speed

Other systems are noisy and others, while the sound of the motor is tolerable, still don't compare to BlueAir. If you're the type of person who is easily distracted by loud noise or the slightest sound, consider a BlueAir system. You'll be able to get through your day easily with their system in your home

Blueair's air purifiers come in three sizes ranging from \$500. to \$750. US. Be sure to measure the area you plan to put it in as we found them to be a bit larger than we expected. The 501 model is suitable (\$500. US) for those living in apartments or condos (as it is more compact and doesn't have a vent on the top like the other models, so you could stack books or picture frames on top of it) and the 601 model (\$600. to \$750. with SmokeStop) for those living in a home with more space.

You don't need to be a handyman or know any technical stuff to keep it in good running condition. It's very easy to change the filters; you don't need a professional to do it for you. Many people are realizing the health benefits of having an air purification system like in their home. They are sleeping much better and the air in their home is much cleaner. They also don't have to worry about pet dander, smoke and other air pollutants inside their home anymore. For these people, it has changed the way they live.
